

2015/2016 School Year Annual AHERA Update.

During the 2015/2016 school year all district buildings were re- inspected as required according to The United States Environmental Protection Agency's 40 CFR 763 subpart E. The inspections were performed by a Licensed Building Inspector and Asbestos Management Planner through the Pennsylvania Department of Labor and Industry from Environmental and Safety Training, Inc.

AHERA reports are available for review as required by law at each building. The AHERA reports are located in the Main Office of each building.

All abatement work that has or may take place in the District is performed by Licensed and Accredited Contractors while air monitoring is done by an independent consulting firm licensed by the Pennsylvania Department of Labor and Industry and approved by the United States Environmental Protection Agency and the Occupational and Safety and Health Administration.

Abatement work has occurred in multiple locations out of necessity to eliminate any potential health and safety hazard. Abatement only occurs out of necessity to perform maintenance work or for emergency purposes otherwise asbestos is to remain undisturbed and intact.

Abatement work has occurred at the following locations during the 2015/2016 school year they are as follows.
