and Financial Services*

3 October 2016

Dear Ringgold High School Parents and Guardians;

The Ringgold School District is committed to providing all of our students with a safe, secure, and healthy learning environment. Accordingly, the District set in motion a plan to test the water quality within all of its buildings for the presence of lead and copper in drinking water.

Mr. Joseph Grad, an environmental specialist employed by the District, tested water sources from various areas of Ringgold High School on Sunday, September 25, 2016. On Thursday, September 29, 2016, the District received the final results. This report cleared all areas of Ringgold High School following the USEPA protocol. The water quality report for Ringgold High School will be posted on the school's website.

The results for the District's other buildings are available, and we will be notifying parents and posting those results on each school's website. As always, the Ringgold School District places the health, safety and well-being of our students as our highest priority. If you have any questions, you may contact my office.

Sincerely,

Dr. Karen L. Polkabila
