

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the [Return on Investment of Afterschool Programs in Pennsylvania](#) study determined that for every dollar invested in after-school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link to PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three-part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students, examine disproportionate impacts on specific student groups, and highlight the LEA's promising practices in supporting students' needs since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in after-school programming. Include a brief description of the indicators used in the decision-making process.

In determining after school programming, Ringgold School District first compared the availability of time during the school day to address the academic and social-emotional needs of all students among the four buildings, K-12. While the elementary and middle school schedules incorporate some time that is available for intervention, the instructional day at Ringgold High School does not currently incorporate any intervention time. The district also considered student data points including state assessment results and course grades. At the high school, credits earned were also taken into consideration. Additionally, the district considered the fact that fifty percent of students across the district qualify as economically disadvantaged, and every school building is a school-wide, Title I school. Since each building qualifies for school-wide, Title I funding, the district determined that all students in grades K-12 may voluntarily participate and receive academic support. At the same time, students who qualify as economically disadvantaged will be specifically targeted for participation when individual student data demonstrates the need for academic support.

Section: Narratives - After-school Program

After-school Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide after- school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children from Low-Income Families	Academic Growth	375	Improvement in course or assignment grade, as applicable, for academic programming

3. Describe the evidence-based resources that will be used to support student growth during the after- school program.

In this instance, the resources are the teachers who will be providing academic support for students, and teachers will utilize the district curricular materials which are aligned to the Pennsylvania standards, as applicable. There is evidence that intensive tutoring improves academic performance, however, as participation in after school programming will be voluntary, students may not attend the requisite number of sessions to meet the threshold noted in such research.

4. Describe the staff that will provide the after- school program (i.e., Internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
15	Internal	District teachers will provide academic support; if an insufficient number of internal staff are willing to work with students, the district will pursue an outside provider.

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

b. The LEA assures it understands it is responsible to ensure that all after-school program staff hold the appropriate certifications for the program that is being delivered.

5. How will the LEA assess the success of the after-school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Pre and post academic data will be gathered for each student who participates in after-school programming related to academic support.	Tracking will occur each time a student participates in after school programming for academic support.	Improvement in course or assignment grade, as applicable, for academic programming

6. How will the LEA engage families in the after-school program?

Each school will inform families about the available after school program.

Section: Budget - Instruction Expenditures

Instruction Expenditures

Budget

\$54,860.00

Allocation

\$54,860.00

Budget Over(Under) Allocation

\$0.00

Budget Overview

Function	Object	Amount	Description
1400 - Other Instructional Programs – Elementary / Secondary	100 - Salaries	\$32,916.00	staff salaries for after school programs
1400 - Other Instructional Programs – Elementary / Secondary	200 - Benefits	\$21,944.00	staff benefits for after school programs
		\$54,860.00
